London Office Monitoring

A Python evidence agent
for market briefings

Compare reports while keeping their sources.
Curated evidence; historical event replay.

Assessment demonstration · 28 October 2026

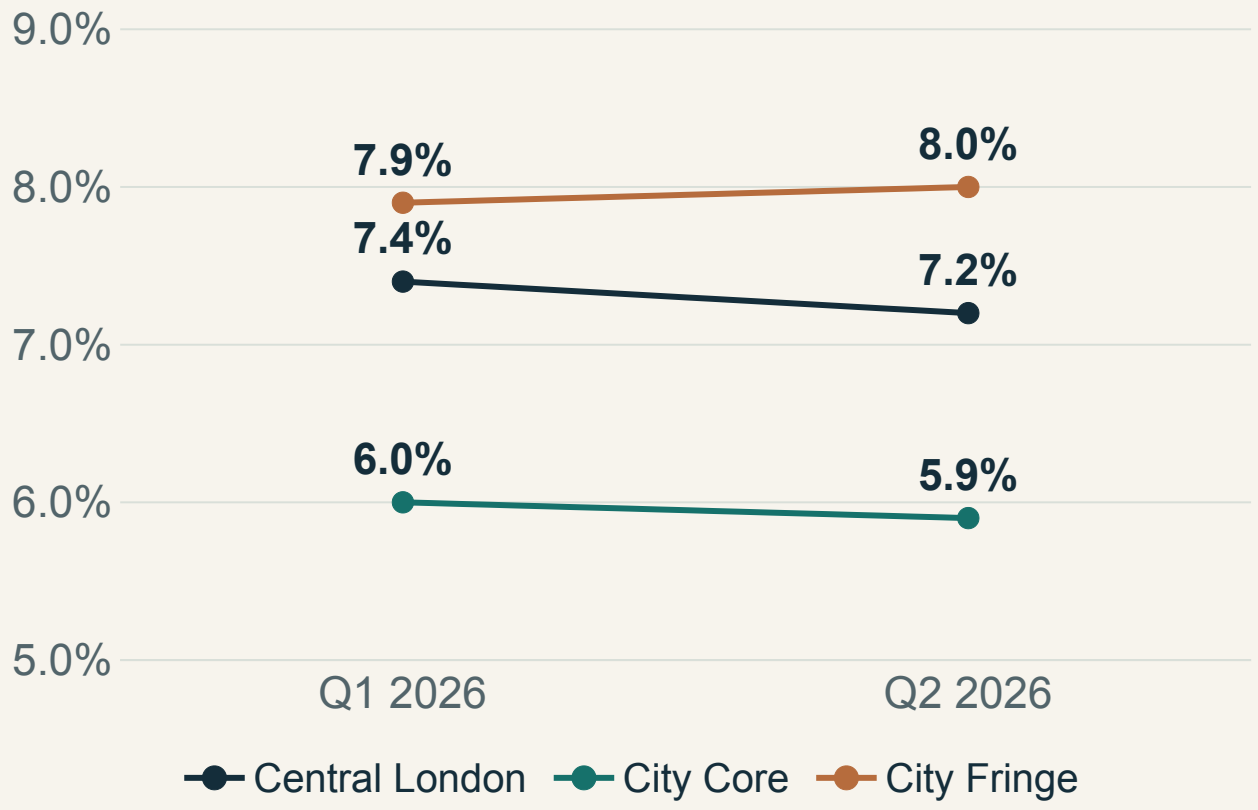

Core and Fringe moved in opposite directions

Quarter-end vacancy in Q1 and Q2 2026

−20 bps

Central London vacancy
7.4% → 7.2%

Take-up: 2.2m → 2.4m sq ft
≈9.1% increase in rounded totals

Savills Q1 2026 · S01 / Savills Q2 2026 · S02

How the agent prepares a briefing

01 Ask and keep context
Retain the geography, period and asset.

02 Read the evidence
Search or retrieve through five defined tools.

03 Check each claim
Validate scope, references and comparisons.

04 Return cited findings
Show sources, caveats and coverage gaps.

Recorded follow-up

“Focus on City Core and City Fringe. Did they move in the same direction?”

City Core −0.1 pp
City Fringe +0.1 pp

Q1/Q2 retained; sources stay visible.
An ambiguous “there” prompts clarification.

Python owns the evidence tools and calculations; the model selects the next action.

Completion and available supply

2 Aldermanbury Square · evidence across announcements

2022 Completion target: December 2025

2025 Later target: Q1 2026

2026 Practical completion: 25 March

321,650

sq ft of completed office space

All offices pre-let
Tenant fit-out to follow

Keep the forecasts. Do not count the completed area as newly available speculative supply.

GPE 2022 · S06 / GPE 2025 · S07 / GPE 2026 · S08

Verified trial and next steps

Recorded Apple profile only

Try a cited market briefing

Run the Python agent, choose a scope, compare periods and inspect the sources.

Core installation needs Python only. Apple adds its optional SDK and a supported Mac.

Next: package the Python trial.
API live remains pending.
ResearchWorkspace is a future host.
